Radiant Portable Gas Heaters

A classic, efficient way to warm your home

Radiant style gas heaters offer a highly efficient heating solution for your home. Compact in size, the heaters in this range pack a powerful heat output!

There are two styles of Radiant Heaters in the range:

- Radiant Convectors that combine the cosiness of radiant heat with fan forced convection heating
- Compact Radiants which offers cosy radiant heat only

Radiant Convectors

- Cosy radiant warmth combined with a powerful fan
- Compact design makes it easy to move from room to room and store away
- Electronic ignition for guaranteed lighting every time
- Top mounted push buttons for ease of operation

Compact Radiants

- Ideal for heating smaller areas or spot heating
- Compact and lightweight design makes them easy to move around
- Easy to use ignition system that lights first time, every time
- Battery powered ignition, can be used in areas without a power connection

Additional Features

Tilt switch

This handy safety feature senses if the heater is knocked over and activates the tilt switch to cut off the gas supply immediately.

Flame failure device

If the flame goes out during operation, the flame failure device cuts the gas off.

Dress guard

All heaters are fitted with a dress guard to reduce the risk of burns.

Oxygen depletion sensor

In the unlikely event the oxygen level in the room falls below a pre-set level, the oxygen depletion sensor turns the heater off. This can be caused if the heater is used in a room too small or there is a lack of ventilation.
